

TOTTENVILLE TOURNAMENT.

People Watching With Interest the Billiard Contest.

The residents of Tottenville are watching with interest the billiard tournament which is being played at the Aquahonga club house, between the members. The member winning the most games out of a given number will be awarded a handsome billiard cue. So far James Hodge leads, having played six games, all of which he has won. William D. Frerichs is a close second. Mr. Frerichs has also played six games, but in the last one, a few days ago, he lost, so he has five to his credit. There will be a match tonight between Harry Laforge and Mr. Frerichs. The contest will not end before the middle of January.

TEN HIGHEST BOWLERS.

The ten bowlers to roll up the highest scores at the Kirby alleys, Smith street, this month, are as follows: J. H. Graham, 238; Harry Neal, 233; Clifford Fothergill, 228; Harry Brown, 215; Herman Albrick, 211; L. B. Moore, 208; William Wilhelm, 206; William Hilker, 205; Harry Fingerote, 203; Bert Rickwood, 200. On Monday night they will roll on the alleys for the monthly prizes.

POPS DID NOT GO.

It was up to the Pop Social Club to go to Bound Brook last night, but, because Bound Brook had failed to put in an appearance in this city at any time, the Pops stayed home. They lost the game, which will be credited to Bound Brook.

STRIKES AND SPARES.

The Seaside bowling club will be out for practice on the Bloodgood alleys, Smith street, this afternoon. They have received word that the Circle bowling club, of New Brunswick, will play them the return game Thursday night.

On Tuesday the Pop Social club, of this city, and the Raritan of New Brunswick, are to bowl on the Klein alleys, New Brunswick. The Eagles, of Metuchen, will go to Bound Brook where they will bowl against the team of that place on the Bound Brook hotel alleys.

The clerks of the Perth Amboy Trust Company have accepted the challenge sent them by the drug clerks in Seaman's store, and will bowl a game on the Bloodgood alleys a week from Monday night.

Lakewood's Fall Season

With the passing of the summer and the fall winds to September there comes a ruling thought in the minds of resorters, the choice of a point of healthful and advantageous location for the winter and, more immediately, for the months of early fall, when summer places of entertainment are closed and cold weather resorts have not yet opened. To the family the problem is a particularly weighty one for the schools all over the country are opening for the year, and it is time the little people took up the business of childhood. And in making choice there are to be considered, as factor, healthfulness, accessibility to business centers, the character of diversions, and social surroundings.

It is true that Lakewood very largely owes its leading place among resorts to the peculiar waters which are most valued at midwinter-warmth shelter and mildness of climate a yet, in all its eight months' season, from fall to spring there are no more perfect months than October and November.

For more than twenty years the first day of October has been the date on which Lakewood has opened its doors to the outside world, and that first day's registrations have been uniformly large, including travelers from mountain and seashore and returning cottagers anxious to get settled again in these Lakewood homes after a summer's wanderings. All through the above named months the habit of out-door life which governed the hot weather season is prolonged in Lakewood, and the golden days of color which imperceptibly pass into frosts and chill of winter are rich in opportunities for sport and exercise on the golf links, and in the woods. If you have never enjoyed the experience, try Lakewood in its early season.

A booklet on Lakewood will be sent free by C. M. Bart, G. P. A., New Jersey Central, New York City. 4189-12-1-t

To Prevent Rust.

To prevent rust on iron and steel take half a pint of fat oil varnish mixed with two and a half pints of highly rectified spirits of turpentine and rub it on the metal with a sponge. This varnish may be used for iron stoves and even on bright steel mathematical instruments without fear of injuring their fine polish and rust will not touch them.

Safer.

"After all," said a deer up in northern Wisconsin, as it gazed on two hunters blazing away at each other, under the impression that the other was a deer. "I am glad I am a deer with four strong legs, because if I were a fool with a gun I would probably be shot by another fool with a gun before night."—Chicago Tribune.

Inventions in Printing World.

The effect of the extraordinary activity in invention and improvement in the printing world since 1880 has been twofold. To the printer himself it has been injurious rather than helpful; to the public it has been of incalculable advantage and has been a potent factor in elevating the standards of good taste.

Why Traveling Is Dangerous

Constant motion jars the kidneys which are kept in place in the body by delicate attachments. This is the reason that travelers, trainmen, street car men, teamsters, and all who drive much, suffer from kidney disease in some form.

Foley's Kidney Cure strengthens the kidneys and cures all forms of kidney and bladder disease. Geo. H. Hausan, locomotive engineer, Lima, O., writes: "Constant vibration of the engine caused me a great deal of trouble with my kidneys, and I got no relief until I used Foley's Kidney Cure." Prince of Montenegro.

Prince Nicholas of Montenegro, the comic opera ruler of the Black mountain principality, which has a population less than that of Rhode Island, was a great athlete in his younger days and is still a good horseman, a capital shot and a splendid swordsman. To his other attainments the prince adds that of being a poet and prose writer of no small talent, his best work being a tragedy, "The Empress of the Balkans." His civil list, only \$14,000 a year, is ample for his simple tastes, which never call for great expenditure.
